## OBJECTIVE

I am extremely motivated to learn and enhance my skills. I want to work for the benefit of the company and enhance its productivity. My aim is to contribute significantly to the company and create products that would effectively impact the users.

## EXPERIENCE

### EASYEAT

March 2021 - Present

#### Front-end developer

- Handled projects and coordinated with the team
- Worked with angularjs and learnt it within few days
- Worked with Analytics
- Actively worked on react js projects.
- Did a strategic release across Indonesia
- Internationalisation via ngx-translate in angular and i18next in react
- Optimised react page lighthouse report from 25 to 75 for performance

### KYRION TECHNOLOGY, DELHI

#### Java Developer Trainee

- Interned at Kyrion Technologies for a period of 2 months as a Trainee Java Developer.
- Learned Java and some concepts of HTML in the internship period.
- Worked on my own Project Idea of Traffic Rule Generator based on Java, a simplified way to spectate traffic rules while on the go as per the Motor Vehicle Act (MVA).

## EDUCATION

### RYAN INTERNATIONAL ,DELHI

2016

Non-medical  
Grades - 74

2020

B.tech,Information Technology  
Grades - 79

## SKILLS

Efficiently skilled in Angular, Javascript and react, Java, HTML, CSS.,

## PROJECTS

### STATIC WEBSITE

- Worked on website creation making my own website to order pizza online. This is a static website showing all varieties of pizza on the page using " javascript , html , css, react js". Named the website as Game of Pizzas and it was a good learning experience
- Codesandbox-<https://nrc9r.csb.app/>.

### SNAKES AND LADDER

- Worked on a mini-project of Snakes and Ladders, a game in which the user has to roll the dice and the player moves around the board facing all the obstacles, incurred on the way, to reach the finishing point
- Technology - javafx
- Github-<https://github.com/aayushmoolchandani98/snakesnladder>.

### RANDOM FEED NEXTJS

- I single handedly managed the entire project
  - It's a website which is server side rendered and i deployed it using vercel
- link : <https://next-js-feed.vercel.app/>

### MY PORTFOLIO

I made my personal portfolio using react and deployed it using vercel
